and decisions, and respecting all stakeholders and the environment. ESG principles are integrated into every aspect of our business.

Ensure financial flexibility: we must ensure our balance sheet always remains able to meet our core funding needs.

What is a Cryptocurrency?

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers. A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.
